Dear Hiring Manager,

I am writing to express my interest in the Software Developer position at your company. With hands-on experience in React, Next.js, Node.js, MySQL/PostgreSQL, and TailwindCSS, I specialize in building scalable and responsive applications that deliver exceptional user experiences.

In my role as a Frontend Developer Intern at Coast Research Technology, I collaborated on multiple projects, enhancing user interfaces and ensuring mobile-first performance. My freelance work further strengthened my ability to integrate APIs, optimize performance, and deliver production-ready solutions to clients.

Some of my notable projects include:

FoodiesHub – a food ordering platform featuring AI-powered customer support.

MedVerify – a drug verification dashboard with fake product tracking.

AllergenAlert – a web app preventing allergen exposure through product ingredient verification.

In addition to my software development background, I have also built foundational expertise in Cybersecurity, backed by a Google Cybersecurity Certificate. This enables me to apply security-first principles in software development, ensuring applications are resilient against vulnerabilities and aligned with industry best practices

I am particularly excited about the opportunity to join your team under the Global Talent Stream program, which aligns with my expertise in modern web technologies and my eagerness to contribute to Canada's thriving tech industry. I am open to relocation and fully prepared to transition quickly into a collaborative, results-driven environment.

Thank you for considering my application. I look forward to the possibility of contributing to your organization and would be glad to discuss how my skills can add value to your team.

Sincerely,

Toluwase Ayomide Emmanuel
